Eric,

Jim did a great job summarizing the issues. The following are some additional thoughts/edits.

1. Vertical Extent Column - note typo in some of the cells for fairly.
2. Suggest adding the words "to meet the project schedule" to the end of footnote # 1.
3. Outfall 48 - The bank erosion column should read NO.
4. Sultzer - Mark Pugh will be back in the office later this week. I will check in with him to add more clarity for the bank erosion column.
5. Downstream PAHs - We might want to push for some limited fingerprinting similar to the work that ARCO did a few years back. The focus would be to select some key locations to help refine the conceptual model (e.g., Gasco downstream tail versus storm water source).

Matt

Thanks Jim. I will be going through this over the weekend. If Matt and Rod have any changes, they should get them to me by COB Tuesday (Chip and I will be in Seattle Monday and Tuesday). I will fold my comments with their comments and turn around to the broader group on Wednesday.

Eric

SMA Data Gaps Table

Eric & Chip,
Here's my try at identifying the data gaps for our individual SMAs. I wanted to have Rod & Matt look at this before I sent it to you, but I didn't get it done in time to give them a chance to review it since I also wanted to get it to you ASAP. So, I'll ask Matt & Rod to review this as you are reviewing it too.
